EasyBot

What do we mean when we say Crypto. Made. Eazy? More than a catchy slogan, this is our mantra, and it is our story.

For too many people, crypto is hard. It can be difficult to learn, confusing to understand and laden with risk.

EazyBot was born from this struggle. During the spring of 2021, CEO & Founder Mohamed Ali was confronted with these realities. Having stumbled through his own challenges and losses, he saw the potential of automated crypto trading. He was introduced to a solution that performed well, at first. But as the market took a massive drop, everything changed. He and those he introduced to this platform were no longer experiencing the best of crypto, and no longer making profits.

WHEN PROBLEMS INSPIRE SOLUTIONS, GENIUS IS BORN

Unwilling to allow his friends to sit in frustration and panic, Mohamed went to work. Leaning into his professional training as an engineer and his passion for numbers, he began developing a strategy that eventually saw their trades and portfolios begin to grow and perform once again. Over the next few months, that winning strategy evolved beyond the capabilities of the platform he was using and the vision for EazyBot was born.

EazyBot is special - powered by amazing technology and brilliant strategy. However, what makes EazyBot most special to us is the people and the problems it was designed to solve.

We believe crypto is the future...and it doesn't have to be hard.

So we made it, Eazy.
